

Governor Statement

Armela Pert

I'm a mum of two and my eldest is in reception at Huntley. I hope that by being a parent Governor, I can offer my contribution in supporting this wonderful school to continue to be a place where children love to spend time and thrive.

I've been working in IT as a software engineer and consultant for the last 16 years and hold a MSc in Computer Science from Reading University. In these years, I've worked in start-ups and big established companies like Hargreaves Lansdown and in different industries: Telecommunications, Healthcare and Fintech. My background has given me skills in problem-solving, strategic planning, and data analysis, which I would use to help the governing board make informed decisions.

I am passionate about supporting the school's continued drive for academic excellence, wellbeing, and inclusion. I am committed to working collaboratively with staff, parents, and the wider community to ensure that every pupil is given the best possible start in life.
